ABOUT ME

After being graduated in 2014 from the University of Liège in architecture, have had the opportunity to do an architecture internship in Vietnam. This experience given me **the taste of travel, discovery and constant desire to learn and reinvented.**

Since March 2015, I work as an architect in a office specializes in the processing and building renovation. During almost 2 year, I personally followed many projects and had the opportunity to become **a part of a team and play an active leadership role by being responsible for several projects.**

I am a positive, curious, creative individual, combining an open mind with passion and diligence. For me, architecture is the logical career path for my interests and professional ambitions.
